

Your CT Chest Report

Easy-to-read AI analysis of your chest scan

Patient: Sam Date: 2026-06-16

Your doctor will review this scan.

WHAT THE AI FOUND

A doctor will review your scan

The AI flagged a possible chest abnormality. Your doctor or radiologist must confirm whether this is clinically meaningful.

WHAT TO DO NEXT

Make an appointment with your doctor and share this report with them. If you have severe symptoms (chest pain, trouble breathing, coughing blood), go to the ER immediately.

QUESTIONS TO ASK YOUR DOCTOR

- What does this AI finding mean in plain language?
- How urgent is this — can it wait, or should we act soon?
- What are my options, and which do you recommend?
- Should I get another scan or test to confirm?
- What symptoms should I watch for, and when should I come back?
- Will my insurance cover the recommended next steps?

ABOUT THIS REPORT

This report was created by an AI system that analyzed your CT chest scan. It is meant to help you understand what the AI noticed — it does not replace your doctor's diagnosis. Please share this report with your doctor and ask any questions you have at your visit.

Not autonomous diagnosis · not a replacement for clinical judgment · not for life-threatening emergency triage · not for direct-to-patient interpretation without clinician mediation · not for unqualified personnel · not for any modality outside the validated list.
